[Week - 06](#)

1) Poor infrastructure can cause hunger in a country.

- ☒ A. True
- ☐ B. False

A. True

poor infrastructure is a direct cause of hunger. It can make it difficult or even impossible to transport food to areas experiencing shortages, leading to situations where people die of hunger in one region even when there is plenty of food in another. Additionally, a lack of irrigation, water, and sanitation infrastructure contributes significantly to hunger and malnutrition.

2) In high income countries, hunger is mainly caused due to poverty that results from ____.

- ☐ A. low GDP of the country
- ☐ B. lack of access to food
- ☐ C. poor public transport infrastructure
- ☒ D. lack of jobs

D. lack of jobs

In high-income countries like the United States, hunger is primarily caused by poverty resulting from a lack of jobs or because existing jobs pay too little

Education for Sustainable Development

3) Which of the following is true about hunger?

- ☐ A. It is a cause of war
- ☐ B. It is an effect of war
- ☒ C. It is both a cause and effect of war
- ☐ D. It is neither a cause nor an effect of war

C. It is both a cause and effect of war

hunger is explicitly described as both a cause and an effect of war and conflict. Wide-scale hunger and poverty can lead to frustration and resentment toward governments, potentially fuel conflict, while war itself destroys infrastructure, displaces communities, and disrupts food systems, thereby causing hunger

4) ____ are most vulnerable to the harmful effects of hidden hunger.

- ☐ A. adults
- ☒ B. infants
- ☐ C. adolescents
- ☐ D. elderly

B. infants

infants and young children are the most vulnerable groups to the harmful effects of "hidden hunger," which relates to the quality rather than just the quantity of food.

Education for Sustainable Development

5) Desertification is typically a result of ____.

- ☐ A. drought
- ☐ B. deforestation
- ☐ C. inappropriate agriculture
- ☒ D. all of the given

D. all of the given

desertification is a process where fertile land becomes desert, and it is typically a result of drought, deforestation, or inappropriate agriculture

6) Which of the following is a key initiative in India for the problem of hunger?

- ☐ A. One Nation, One Plate
- ☐ B. One Nation, One Hunger
- ☐ C. One Nation, No Ration Card
- ☒ D. One Nation, One Ration Card

D. One Nation, One Ration Card

The 'One Nation, One Ration Card' initiative is a significant move in India to address hunger. It aims to universalize access to the Public Distribution System (PDS), allowing beneficiaries to obtain their food rations from any geographical location in the country

Education for Sustainable Development

7) In the past, MGNREGA has ____.

- ☐ A. decreased rural wages
- ☐ B. increased gender wage gaps
- ☐ C. enabled poor access to food
- ☒ D. reduced distress migration from rural areas

D. reduced distress migration from rural areas

In the past, the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) has successfully reduced distress migration from rural areas. Additionally, it has been credited with increasing rural wages, reducing gender wage gaps, and enabling better access to food

8) Wheat productivity can suffer if ____.

- ☒ A. temperature rises
- ☐ B. temperature does not change
- ☐ C. temperature falls
- ☐ D. none of the given

A. temperature rises

wheat productivity is critically dependent on cold night temperatures and will suffer if temperatures rise due to global warming

Education for Sustainable Development

9) Bringing forgotten and neglected foods like yam into cultivation and onto the market is called ____.

- ☒ A. diversifying food basket
- ☐ B. restricting food basket
- ☐ C. completing food box
- ☐ D. wasting food basket

A. diversifying food basket

Bringing forgotten and neglected foods like millets, yams, leafy green vegetables, and other underutilized crops into cultivation and onto the market is called "diversifying the food basket". This strategy is suggested as a way to cope with climate change and the potential setback in wheat production

10) Home gardening has been proven as a reliable source to supplement food and nutritional security

- ☒ A. True
- ☐ B. False

A. True

Home gardening has been proven to be a reliable source for supplementing food and nutritional security at the household level. It helps empower communities to provide nutritious food for themselves, especially when combined with government aid that addresses access to staple foods.

Education for Sustainable Development

Week 6 : 3. ESD & Sustainability ESD for achieving SDG-4.4

- b) 21st Century competencies for global & decent jobs
- c) Sustainable entrepreneurship

1. Poor infrastructure can cause hunger in a country. A. True
2. In high income countries, hunger is mainly caused due to poverty that results from ____. D. lack of jobs
3. Which of the following is true about hunger? C. It is both a cause and effect of war
4. ____ are most vulnerable to the harmful effects of hidden hunger. B. infants
5. Desertification is typically a result of ____. D. all of the given
6. Which of the following is a key initiative in India for the problem of hunger? D. One Nation, One Ration Card
7. In the past, MGNREGA has ____. D. reduced distress migration from rural areas
8. Wheat productivity can suffer if ____. A. temperature rises
9. Bringing forgotten and neglected foods like yam into cultivation and onto the market is called ____. A. diversifying food basket
10. Home gardening has been proven as a reliable source to supplement food and nutritional security at the household level. A. True
