[Week - 08](#)

1) The Okayama Commitment is from ____.

- ☐ A. Russia
- ☐ B. South Korea
- ☐ C. North Korea
- ☒ D. Japan

Correct Answer: D. Japan

The Okayama Commitment (2014) emerged from Okayama City, Japan, during the Kominkan-CLC International Conference on ESD, promoting community-based learning for sustainable development beyond the UN DESD.

2) Which of the following is a policy support mechanism of Okayama Commitment?

- ☐ A. Taking money
- ☒ B. Content development
- ☐ C. Exploitation of resources
- ☐ D. None of the given

Correct Answer: B. Content development

The Okayama Commitment identifies **content development** as a key policy support mechanism, alongside providing resources and networking/partnerships, to advance ESD through community-based learning centers (Kominkan-CLCs).

Education for Sustainable Development

3) Education is related to SDG 9 such that ____.

- ☒ A. education helps in skills required to build resilient infrastructure
- ☐ B. education enhances skills to use natural resources more sustainably
- ☐ C. education is critical to lifting people out of poverty
- ☐ D. education helps reduce gender gaps

Correct Answer: **A. education helps in skills required to build resilient infrastructure**

Education directly supports SDG 9 by developing technical skills for resilient, sustainable infrastructure through STEM training and vocational programs targeting quality, reliable infrastructure development.undp+1

4) The frame model structures sustainability competencies into ____ goal dimensions.

- ☐ A. 8
- ☒ B. 3
- ☐ C. 11
- ☐ D. 45

Correct Answer: **B. 3**

The frame model organizes sustainability competencies into **3 goal dimensions**: cognitive (thinking/knowledge), affective-motivational (values/attitudes), and behavioral (action/skills). This structure guides ESD curriculum design across educational levels.

Education for Sustainable Development

5) Sustainability issues must be looked at through a ____ approach.

- ☐ A. isolated thinking
- ☐ B. independent thinking
- ☐ C. silos thinking
- ☒ D. systems thinking

Correct Answer: **D. systems thinking**

Sustainability issues require **systems thinking** to understand interconnections between environmental, social, and economic factors, unlike isolated, independent, or siloed approaches that miss complex interactions and feedback loops.

6) Technology and Science can alone solve all our sustainability problems.

- ☐ A. True
- ☒ B. False

Correct Answer: **B. False**

Technology and science alone cannot solve sustainability problems; they require complementary social, behavioral, economic, and policy changes to address complex systemic issues like consumption patterns and governance.

Education for Sustainable Development

7) GAP in the context of ESD stands for ____.

- ☒ A. Global Action Programme
- ☐ B. Great Activity Plan
- ☐ C. Global Attention Programme
- ☐ D. Great Action Policy

Correct Answer: **A. Global Action Programme**

GAP is UNESCO's **Global Action Programme** on ESD (2015–2030), succeeding the UN Decade of ESD with 5 priority action areas: policy integration, whole-institution approaches, teacher training, youth empowerment, and local sustainable solutions.

8) ____ competency is the ability to understand and evaluate multiple futures.

- ☒ A. anticipatory
- ☐ B. normative
- ☐ C. strategic
- ☐ D. collaborative

Correct Answer: **A. anticipatory**

Anticipatory competency involves understanding and evaluating multiple possible futures, including scenarios, uncertainties, and long-term consequences essential for sustainability decision-making.

Education for Sustainable Development

9) The ability to question norms is ____ competency.

- ☒ A. critical thinking
- ☐ B. normative
- ☐ C. anticipatory
- ☐ D. self-awareness

Correct Answer: **A. critical thinking**

Critical thinking competency involves questioning norms, practices, and opinions while reflecting on personal values, perceptions, and actions to actively participate in sustainability discourse.

10) Action-oriented learning draws on Kolb's concept of ____.

- ☐ A. experiential learning
- ☒ B. experimental learning
- ☐ C. rote learning
- ☐ D. direct learning

Correct Answer: **B. experimental learning**

Action-oriented learning draws on Kolb's **experimental learning cycle** (concrete experience → observation/reflection → abstract concepts → active experimentation), emphasizing learning through practical application and reflection as specified in ESD course materials.

Education for Sustainable Development

Week 8 : 4: ESD & Social Transformation ESD for promotion of

a) Responsible consumption & production

b) Peace & justice in the society
