[Week - 09](#)

1) Activities like fish bowl discussion help ____.

- ☐ A. passive thinking
- ☒ B. critical and reflexive thinking
- ☐ C. rote-memory
- ☐ D. all of the given

The correct answer is **B. critical and reflexive thinking.**

Activities like fish-bowl discussions are interactive methods specifically used to cultivate critical and reflective thinking skills. These exercises require individuals to actively analyze different perspectives, question underlying assumptions, and engage deeply with complex topics.

2) Which of the following is not a vision-building exercise?

- ☐ A. scenario analysis
- ☒ B. classroom teaching
- ☐ C. science fiction thinking
- ☐ D. dystopian storytelling

The correct answer is **B. classroom teaching.**

Vision-building exercises are specific educational methods used to help learners imagine and analyze future possibilities. These targeted exercises explicitly utopian and dystopian storytelling, and science-fiction thinking. imaginative exercise designed to build a sustainable vision for the future.

Education for Sustainable Development

3) The ability to hold contradictory thoughts and feelings is an ____ competency.

- ☐ A. intellectual
- ☐ B. interpersonal
- ☒ C. intrapersonal
- ☐ D. institutional

The correct answer is **C. intrapersonal**.

Intrapersonal competencies involve self-awareness and internal cognitive processing. The ability to hold contradictory thoughts and feelings without needing to immediately resolve them is a specific intrapersonal skill. This competency helps individuals navigate complex situations, cultivate awareness, and manage internal stress or conflicting perspectives effectively.

4) ____ intelligences is proposed by Howard Gardner.

- ☒ A. multiple
- ☐ B. singular
- ☐ C. double
- ☐ D. triple

The correct answer is **A. multiple**.

Howard Gardner developed the theory of multiple intelligences to describe the diverse ways in which humans understand and interact with the world. This framework moves beyond a singular measure of intelligence to encompass various distinct capacities. It represents the sum total of human capacities to influence, interact with, and communicate with our environment.

Education for Sustainable Development

5) ____intelligence refers to using one's body in skilled ways.

- ☒ A. kinesthetic
- ☐ B. musical
- ☐ C. naturalist
- ☐ D. spatial

The correct answer is **A. kinesthetic**.

Bodily-kinesthetic intelligence is a specific category within the multiple intelligences framework that focuses on physical coordination and dexterity. Individuals with this intelligence possess the capacity to use their whole body or parts of their body in highly differentiated, skilled ways. This allows them to effectively navigate physical tasks and express themselves through movement.

6) The idea of big transformation implies that changes in individual action are intertwined with ____.

- ☐ A. reorganization of self
- ☒ B. reorganization of societal structures
- ☐ C. ignorance of others
- ☐ D. none of the given

The correct answer is **B. reorganization of societal structures**.

Achieving significant sustainable development requires a profound big transformation that goes beyond isolated personal habits. It necessitates an interconnected approach where changes in individual actions and behaviors are deeply woven together with the fundamental reorganization of broader societal structures. This combined effort is required to track the transformation towards a more just and sustainable direction.

Education for Sustainable Development

7) In ____ learning, learners start to question all the things they knew to make room for new insights and information.

- ☒ A. transformative
- ☐ B. transactional
- ☐ C. trivial
- ☐ D. trans-disciplinary

The correct answer is A. transformative.

Transformative learning is characterized by a fundamental shift in a person's consciousness and worldview. During this deeply reflective process, learners actively challenge and question all the things they previously knew. This deliberate questioning creates the mental space necessary to integrate radically new insights and information.

8) Which of the following is a key principle of adult education?

- ☒ A. need to know why
- ☐ B. guilt
- ☐ C. boredom
- ☐ D. none of the given

The correct answer is A. need to know why.

Andragogy, or the practice of adult education, is guided by six core assumptions that differentiate it from traditional childhood learning. A fundamental principle among these is that adult learners possess a strong "need to know why" they are engaging in a specific educational process. This principle ensures that the learning experience is grounded in clear relevance to their own self-concept and readiness to learn.

Education for Sustainable Development

9) ____ Sustainable Development is a process through which people influence and share control over development initiatives, decisions and sources that affects them.

- ☐ A. Internal
- ☐ B. Societal
- ☒ C. Participatory
- ☐ D. Transformational

The correct answer is **C. Participatory**.

Participatory sustainable development emphasizes active community involvement and empowerment rather than top-down directives. It ensures that the people directly affected by development initiatives are deeply engaged, allowing them to influence and share control over resources and decisions. This collaborative approach encourages individuals to critically reflect and actively contribute to creative problem-solving.

10) ____ is the common regulatory body for higher education in India.

- ☒ A. HECI
- ☐ B. WHO
- ☐ C. AIIMS
- ☐ D. None of the given

The correct answer is **A. HECI**.

The Higher Education Commission of India (HECI) serves as the single, overarching umbrella organization for the country's higher education system. It functions as the common regulatory body responsible for overarching standard-setting, funding, and accreditation. This comprehensive system streamlines governance across various disciplines, specifically excluding medical and legal pedagogy.

Education for Sustainable Development

Week 9 : 4: ESD & Social Transformation ESD for promotion of
